A: Personal record.

Name: Martin Eden
ORCiD: 0000-0002-1542-2527
Webpage: https://research.manchester.ac.uk/en/persons/martin.eden

Education

2023 to 2024	The University of Manchester, PG Cert in Higher Education
2015 to 2019	The University of Manchester, PhD Medicine
2012 to 2014	University of Birmingham, MSc in Health Economics and Health Policy
2003 to 2005	Salford University, MRes Health & Social Care
1992 to 1995	University of Luton, BA Humanities

Qualifications

2025	Post Graduate Certificate in Higher Education
2020	Doctor of Philosophy in Medicine (Health Economics)
2015	Master of Science in Health Economics and Health Policy: Merit
2005	Masters in Research in Health and Social Care
1995	Bachelor of Arts in Humanities (Hons): 2.ii

Present Appointment

Jan 20 to present	Research Fellow in Health Economics and National Institute for Health and Care Research (NIHR) Research Design/Support Service Adviser, Manchester Centre for Health Economics, The University of Manchester

Previous Appointments Held

Oct 18 to Jan 20	Research Fellow in Health Economics, Manchester Centre for Health Economics, The University of Manchester
Oct 15 to Oct 18	NIHR Doctoral Research Fellow, Manchester Centre for Health Economics, The University of Manchester
Jan 12 to Sep 15	Research Associate/Fellow in Health Economics, Manchester Centre for Health Economics, The University of Manchester
Sep 09 to Dec 11	Research Assistant, National Primary Care Research and Development Centre, The University of Manchester
Aug 04 to Sep 09	Research Associate, School of Pharmacy, The University of Manchester
Mar 04 to Aug 04	Research Governance Coordinator, Manchester Mental Health and Social Care Trust
Oct 02 to Mar 04	Research Assistant, Salford Primary Care Trust
Jan 02 to Oct 02	Clinical Audit Officer, South Manchester Primary Care Trust & South Manchester University Hospitals Trust
Sep 00 to Dec 01	Flu project / Disease Register Worker, Manchester Health Authority & North Manchester Primary Care Trust

Visiting Appointment

Jul 19 to Aug 19	Visiting Scientist, QIMR Berghofer Medical Research Institute, Brisbane

B. Teaching, Learning and Student Support.

Teaching Highlights

Since 2012, I have contributed to the delivery of the Economic Evaluation of Healthcare module, for the Master in Public Health, as a Teaching assistant and as co-module leader during 2014-2015. I was responsible for co-ordinating the double marking of all our essays

Dates	*Role*	*Course code and title and teaching delivered*	*Typical numbers of students*
2012-14 2023-24	Teaching Assistant	POPH6002: Economic Evaluation of Healthcare module, Masters in Public Health	~40
2020	Teaching Assistant	BIOL65002: NHS Scientist Training Programme: Genetic Counselling, The University of Manchester	~20
2017	Teaching Assistant	BIOL67372: Economics of Genomics and Precision Medicine module, Master of Science in Genomic Medicine	~7
2014-15	Co-module Lead	POPH6002: Economic Evaluation of Healthcare module, Masters in Public Health	~40

Learning materials

BIOL67372: Co-developed teaching materials.

Student Supervision

1. MBChB Medicine. The University of Manchester. Applied Personal Excellence Pathway: Project. A systematic review on the use of the term 'personal utility' in the context of genetic/genomic testing. 2017

Other indicators of teaching-related academic esteem and activities

Feedback from when I was co-module leader of MPH module:

"Thank you for this feedback. It is very helpful and I must commend you that this is the best and clearest feedback I have ever received since I started my MPH course. I would go back and look at all the areas of weaknesses you have identified. I would also recommend this model of feedback for the other courses."

C. Scholarship.

BIOL67372: Produced four video interviews on the value of precision medicine with clinicians, industry leads, and decision maker

POPH6002: I conceived the idea to produce video podcasts to complement existing teaching materials. I set up and managed a small team to produce the first four podcasts and liaised with the MPH e-learning team to complete this work.

I have audited two Masters level modules (Philosophical Bioethics & Ethics and Genetics), completed one as a student (Health Behaviour Change)

D. Research.

Highlights

I am a health economist and mixed methods researcher with advanced qualitative skills and Master-level training in health behaviour change.

I have an established record and continuing trajectory of output of high-quality, peer-reviewed research publications or other equivalent recognised forms of research output

- My 36 ORCiD Works are listed here: https://orcid.org/0000-0002-1542-2527
- Published in high quality journals including *Genetics in Medicine*, *British Medical Journal* and *The Lancet*.
- I have an *h*-index of 15, cited 999 times, (Scopus)
- 65% of my articles published in the top 25% of journals (CiteScore)
- Eleven peer-reviewed articles since 2020
- Since 2022, first authored papers in British Journal of Health Psychology (IF: 7.9), Rheumatology (IF: 5.5), and The British Journal of Dermatology (BJD) (IF: 11.11)
- Sole authored paper was named as Personalized Medicines most read editorial of 2021
- My BJD paper on the economic impact of 'banning sunbeds' was mentioned by 67 news outlets and is in the top 5% of all research outputs scored by Altmetric[1]
- BJD paper was reported in national newspapers, magazines, radio, websites (e.g. The Guardian, BBC, Grazia) across the UK and Australia.

I have a sustained record of success in obtaining external research funding

- Secured £1.4 million in grant income as a co-applicant and >£260K as principal investigator
- I won a highly competitive NIHR Doctoral Research Fellowship.

I have established reputation in national and international research communities

- Invited to work as Visiting Scientist at QIMR Medical Research Institute
- Recognised contribution to internationally important work in two impact case studies
- Nine invited overseas presentations
- Selected as podium presenter at our discipline's leading international conference
- Named as expert in outcomes research for Genomics England
- Health economist for an EU Funded Consortium
- Active collaborations across Australia and North America
- Over 40% of my co-authored papers include an international collaboration.

Conference Contributions

I have contributed to 24 national and 7 international conferences. Notably, I was selected to deliver a podium presentation of findings from my NIHR Doctoral Research Fellowship at the 2017 International Society for Pharmacoeconomics and Outcomes Research (ISPOR) 22nd Annual International Meeting (podium acceptance rate <3%).

Selected contributions

1. **Eden M,** Wilkinson S, Murray A, Bharathi PG, Taylor C, Payne K, Herrick A. Nailfold Capillaroscopy: a Survey of Current UK Practice and 'Next Steps' to Facilitate Generalised Uptake. British Society of Rheumatology Annual Conference, Glasgow, 25-27 April 2022

2. Research Funding

I have secured £1,657,098 funding in total. Since being employed as a Research Fellow, this has included >£260k as PI and £1.39m as Co-I.

Start /end date	Role	Project title	Funder	Amount

December 2025 to January 2028	Co-I and Lead Health Economist (Credit Share 22%)	Relational approach to working with young people who self-harm (RELATE-YP): A Feasibility Trial	NIHR RfPB	£299,919
May 2024 to June 2026	Co-I and Lead Health Economist (Credit Share 15%)	Evidencing the need for routine sensory motor assessment and support for autistic adults and identifying appropriate intervention pathways	NIHR RfPB	£152,486 .
October 2021 to April 2022	Co-I (Credit share 50%)	Better understanding of the costs and outcomes of melanoma management to assess the impact of melanoma prevention programmes: an expert elicitation study	Melanoma Focus	£16,450
May 2018 to March 2024	Co-I and Lead Health Economist (Credit Share 20%)	Randomised Controlled Trial of Job Retention Vocational Rehabilitation for Employed People with Inflammatory Arthritis: The WORKWELL Trial	Arthritis Research UK	£651,585
April 2019 to April 2021	Co-I and lead Health Economist (Credit share 25%)	Feasibility Study for Comparative Trial of Hybrid or Cemented Implants for Total Hip Replacement: HipHoP (Hip Arthroplasty with Hybrid or Cemented Implants).	NIHR RfPB	£272,285
May 2019	Student	To attend Society of Medical Decision Making 41st Annual North American Meeting, Portland, USA	The University of Manchester, International Conference Fund	£500
October 2015 to October 2018	PI (Credit Share 25%)	Evaluating the economic benefits of complex interventions: accounting for non-health effects.	NIHR Doctoral Research Fellow	£261353
September 2012 to June 2015	MSc Student	Part payment of MSc fees	The University of Manchester, STDU	£2520.

3. Supervision and assessment of postgraduate research students

Start /end date	**Role**	**Degree**	**Funder**	**Expected submission date, or completion date**	**Other**
Apr 24 FT 3yr	Co-supervisor,	PhD, Attachment and the impact of enforced mother-child separation on adult children in the UK family courts	Self	In progress / due to submit 2027	

Oct 2011 FT 3yr	Methodological advisor: Advice and methodological guidance	PhD, Using discrete choice experiments to value benefits and risks in primary care. The University of Manchester	NIHR School for Primary Care Research (SPCR) Ph.D. Studentship	Completed, awarded 2015	Now senior economist in consultancy, produced 10 PhD-related publications
Feb to Sep 2024	Co-supervisor	MRes: Epidemiology of tanning dependence and other psychopathology related to indoor tanning: a systematic review	Self	Completed, awarded 2024	Presented results at national dermatology conference and UK Society for Behavioural Medicine Special Interest Group. First author on paper submitted to BJD
Feb to Sep 2024	Co-supervisor / 2nd Marker	MPH: Interventions to reduce indoor tanning: a components and costings review	Self	Completed, awarded 2024	Presented results to NHSE Regional Public Health Meeting
Feb to Sep 2015	Co-supervisor	MPH: A survey of England's CCGs and CSUs to determine the electronic risk stratification tools in use in primary care	Self	Completed, awarded 2015	

4. Positive Recognition and reputation in relevant national and/or international research communities

Invited Academic Presentations: International

1. One more step towards skin cancer prevention: the case for banning sunbeds in the UK. QIMR Berghofer Medical Research Institute, Brisbane, Australia. 2019
2. One more step towards skin cancer prevention: the case for banning sunbeds in the UK, Economics and Public Health Meeting, The University of Queensland, Brisbane, Australia. 2019
3. Evaluating the economic benefits of complex interventions: accounting for non-health effects, Centre for the Business and Economics of Health, The University of Queensland, Australia. 2019
4. Evaluating the economic benefits of complex interventions: accounting for non-health effects, Centre for Health Policy, The University of Melbourne, Australia. 2019
5. Evaluating the economic benefits of complex interventions: accounting for non-health effects, Centre for Health Economics Research and Evaluation, University of Technology Sydney, 2019
6. Evaluating the economic benefits of complex interventions: accounting for non-health effects, QIMR Berghofer Medical Research Institute, Brisbane`, Australia. 2019
7. HTA of whole genome sequencing. EU(FP7) 3Gb-Test Consortium Meeting, Prague, 2015
8. HTA of whole genome sequencing. EU(FP7) 3Gb-Test Consortium Meeting, Athens, 2014
9. HTA of whole genome sequencing. EU(FP7) 3Gb-Test Consortium Meeting, Lieden,. 2014

Prizes

1. The University of Manchester, Faculty of Biology Medicine and Health, Outstanding Contribution to Patient and Public Involvement & Engagement (Highly Commended) 2024: *Davies, Alan, Davies Ang, Dowding D, Gasteiger N, Khan N, Vercell A, Ali SM,* ***Eden M****: 'Gene', an app to improve genetics literacy co-designed with the British Pakistani community*

2. Royal College of General Practitioners (RCGP) Research Paper of the Year 2013 (Category winner -Health Service Delivery and Public Health):*Kennedy A, Bower P, Reeves D, Blakeman T, Bowen R, Chew-Graham C,* ***Eden M,*** *Fullwood C, Gaffney H, Gardner C, Lee V, Morris R, Protheroe J, Richardson G, Sanders C, Swallow A, Thompson D, Rogers A. (2013). Implementation of self-management support for long-term conditions in routine primary care settings: A cluster randomised controlled trial. British Medical Journal 346:f2882*

3. Prize plenary award winner - 39th Annual Scientific Meeting for the Society for Academic Primary Care 2010:*Rodgers, S, Avery, AJ, Cantrill, J, Armstrong, S,* ***Eden M,*** *Kendrick, D, Sheikh, A. Assessing the effectiveness of an IT-based pharmacist-led intervention aimed at reducing proportions of patients at risk of medication errors in family practice: the PINCER Trial.*

Offices Held in Professional Societies

1. President of International Society for Pharmacoeconomics and Outcomes Research Manchester Chapter Students' Chapter (2017-2018)
2. Co-editor of of International Society for Pharmacoeconomics and Outcomes Research Manchester Students' Newsletter (2017-2018)
3. Member of International Health Economics Association Economics of Genomics and Precision Medicine Special Interest Group
4. Member of The Genomics England Clinical Interpretation Partnership for Health Economics and named expert in outcomes measurement research (HE GeCIP) (2017-2019)

5. Other indicators of research-related academic esteem and activities

I have extensive networks in academia, and beyond, which have been central to the success of several projects I have led on.

E. Service and Leadership

Highlights

I have made and continue to make significant contributions to NIHR infrastructure initiatives. I am a member of Manchester NIHR BRC Inclusive Research Methods Team and was part of the Cancer Cluster's PPIE & Inclusive Research Event Organising Committee. The event was attended by 80 people in person and a further 56 online.

Example responses from feedback from question: 'What did you find most useful from the event?':

"Talk from Health Economist…knowing how the different NIHR organisations fit together"
"The concept of the event was really inspiring, thank you. It's given us ideas that we can take forward"

I contribute to the NIHR HealthTech Research Centre (HRC), I was invited to be part of the national HRC Digital HealthTech & AI Core Working Group

For the RSS, I provide support for fellowship and grant applications and continue to receive positive feedback:

"We'd like to extend a *huge thank you* for your invaluable contributions to the NIHR RSS, NIHR Academy Scheme Practice Interviews held over the past two weeks.

We've already received enthusiastic feedback from candidates who found the experience extremely helpful in preparing for their upcoming interviews. It's also been wonderful to see RSS colleagues stepping into the role of interview panel chairs—some for the first time."

Email from NIHR Research Support Service (RSS) (November 2025).

"Thank you so much for sending your comments and feedback. It's helped us to see the points that need clarifying or earlier explanation within the application."

Email from Senior Research Fellow – Lancaster University – (October 2025)

Roles

Providing support around inclusive research methods to BRC Cancer Cluster since April 2025. In my capacity of NIHR RSS adviser and member of NIHR HealthTech Research centre for Emergency and Acute Care,

- Working with living with and beyond cancer colleagues to analyse feasibility trial data to inform HTA submission in 2026
- Advice and signposting to resources for Neurologist doing PPIE for MND project (October 2025)

Contributions within the organisational structure of the University of Manchester

1. Manchester Centre for Health Economics. Co-editor MCHE Newsletter. 2019 to 2024
2. Manchester Centre for Health Economics, Member of Centre Management Team. 2017-2018
3. Manchester Centre for Health Economics, Organiser and Chair of centre meetings. 2017-2018
4. Member of Programme Committee for Postgraduate Courses in Public Health and Primary Care, Institute of Population Health. 2014-2015
5. Manchester Gold Mentorship Scheme, Mentee. 2009
6. School of Pharmacy, School Board, Deputy Chair of the Researchers Forum and Early Career Researcher's Representative. 2007-2009

Supervisory roles

1. NIHR Greater Manchester Patient Safety Research Collaboration: medication safety theme: supervisory support for Research Associate, 2023 to 2024
2. HIPHOP Study & Workwell Trial, Supervision of Research Associate, 2019 to present
3. Centre for Musculoskeletal Health & Work, Building the business case. Workstream 1: Supervision of Research Associate, 2022 to 2023
4. The Regard Study, Supervision of Research Associate, 2013 to 2015

Collegiality

Supporting the Development of Junior Researchers

1. Six mock interview panels for NIHR Doctoral Fellowships in November 2025
2. Currently acting as senior author supporting HRC Research Assistant to first author a paper
3. I provided advice and support for a successful application to the NIHR Doctoral Research Fellowship Scheme. I provided ongoing critiques of each iteration of draft applications and arranged and chaired a mock interview panel. I was the NIHR RDS Case Manager for this application.
4. For a successful application to the Wellcome Trust (2023), I provided ongoing advice and critiques of draft applications and sat on a mock interview panel.

5. I supported Dean's Prize 2023 recipient in their development of a NIHR Advanced Fellowship application and chaired mock interview panel. I was NIHR RDS Manager for this application.
6. Informal support to early career researchers: I am a source of support and practical advice to early career researchers based in the Manchester Centre for Health Economics.
7. Promoting the work of junior researchers: I was a Member of ISPOR's Newsletter Committee (2017-2018) and collated and promoted work by students of Manchester-based universities
8. Internal training: secured funding (as part of my NIHR Fellowship) to commission four-days of bespoke training in Best-worst Scaling provided by TF Choices. Attended by ~10 Research Associates/ Assistants from School of Health Sciences and School of Social Sciences.

High quality international, interdisciplinary collaborations

Within academia, health care, and the charity sector, I have collaborative ties across the UK and worldwide. I have helped to develop and maintain a particular strong and productive relationship with researchers and decision makers in the UK and Australia working on skin cancer projects.

F. Innovation, Knowledge Exchange and External Engagement

Highlights

My work has supported the University's social responsibility goals. My contributions to skin cancer and patient safety work have been recognised in impact case studies. The qualitative work I did for the Centre for Work & Health was cited in a parliamentary report. I have made significant contributions to academic outputs around medication safety which has changed national working practices and has proved influential beyond the UK.

The qualitative and health economics work I co-led on continue to demonstrate a pathway to impact. The work has received significant interest in mainstream media and has been cited in national decision-making processes.

1. Participation in advisory committees or professional or practice-based forums

Invited to contribute to International Collaborative for Translational Digital Health's Equity Workshop and draft "Strategic Intent for Digital Health Equity" (September – October 2025)

Contributed to workshop by highlighting potential for stated preference methods to inform development and evaluation of interventions. My suggestions for around how new health economics methods can incorporate equity concerns has likely informed strategic intent e.g. "We will encourage pluralism in research teams including, but not limited to, technical disciplines, research methods, and socio-demographic characteristics" and "we will advance generalisable methodologies and best practice principles, while enabling tailoring of approaches for research with specific populations, where needed" Strategic Intent for Digital Health Equity Working Draft (October 2025)

NIHR Public Health Research Programme: Peer support intervention to improve mental health outcomes in those who have experienced miscarriage: systematic review and evidence synthesis of effects, barriers and facilitators to inform service design PI: Burton. February 2024 to present

In annual Study Steering Committee Meetings (n=2), I have provided advice on study design.

NIHR HealthTech Research Centre Methodology Working Groups – September 2025 to present

NIHR HealthTech Research Centre - Digital HealthTech & AI Core Working Group – September 2025 to present

Contributed to inaugural meeting and reviewed terms of reference

2. Knowledge creation and transfer in partnership with industry, government, NGOs, learned societies or professional bodies

- Ongoing collaboration with Wellbeing Specialist for telecoms and airline industry
- As part of EU (FP7) 3-GB Test Consortium, I worked with two SMEs providing molecular testing and whole genome sequencing across Europe (Cartegenia, Service XS).

3. Internal and/or external activity in support of the University's social responsibility goals

I have provided informal external mentorship and specific advice to Director of Local Authority and an industry worker undertaking a Faculty of Public Health Registration an MBA respectively.

4. Activity that enhances public understanding of, and engagement with, knowledge and scholarship, or that contributes to a well-informed public debate

Media
1. Ban on solariums in England would save hundreds of lives from skin cancer, study finds. The Guardian. 18/05/22
2. Scientists: 'A ban on sunbeds could save lives from skin cancer'. BBC News. 20/05/22
3. Indoor tanning ban would reduce melanoma deaths, show researchers. Manchester Cancer Research Centre News. 2023
4. Is it time to ban sunbeds? Grazia Magazine (2023) Issue 858
5. Too close to the sun: The health benefits and economic case for banning sunbeds. Policy @Manchester Blog 16/06/22
6. Podcast for The University of Manchester and the Manchester Cancer Research Centre. One in Two. Is early detection cost effective? 17/10/22
7. Sunbeds should be banned in UK, skin cancer experts say. The Guardian. 01/10/25

5. Influence on professional practice or on policy

Health and work
Evidence submitted (https://committees.parliament.uk/writtenevidence/124982/pdf/) by Professor Suzan Verstappen, Dr Martin Eden, Dr William Whittaker, and Dr Hamied Haroon cited in a Lords Public Services Committee inquiry report on *Think Work First: The transition from education to work for young disabled people*. October 2024.

Patient safety

- PINCER has been rolled out to 41% (>2800) of GP Practices in England.
- More than 27 million patient records were checked identifying more than 222,000 at risk patients.
- Likely that significant reduction in hospital admissions and patient harm followed.
- I am acknowledged as a main researcher in a University of Manchester impact case study:

> *Reducing prescribing errors and improving patient safety in primary and secondary health care. Impact Case Study, The University of Manchester. Noyce P, Ashcroft D, Tully M, Lewis P, Cantrill J, Morris C, Eden M, Dornan T. https://research.manchester.ac.uk/en/impacts/reducing-prescribing-errors-and-improving-patient-safety-in-prima 2014*

Skin cancer

- My paper was presented as key evidence to Ireland's Department of Health (2025)
- Cited in 2005 BMJ editorial that was reported across UK media outlets (n=160)

- My economic model and qualitative evidence synthesis formed the basis of a Manchester Cancer Research Centre impact case study (2022):

  The Case for Banning Sunbeds: cost-effectiveness analysis of a policy-based intervention to reduce melanoma and other skin cancers associated with indoor tanning, Impact Case Study, Manchester Cancer Research Centre. Eden M, Gordon L, Green AC, Lorigan P, Payne K, Epton T, Rhodes L, Marais R, Hainsworth R https://www.mcrc.manchester.ac.uk/impact-case-studies/the-case-for-banning-sunbeds/

- Westminster Hall Debate and a question – referencing our work – was recorded in the Hansard (2022)
- Invited to present findings and discuss our work at Northern Ireland Skin Cancer Prevention Group
- Paper was reported across various national media outlets in the UK and Australia

6. Creation, development and exploitation of intellectual property, including open access material

1. Co-created economic model to understand the economic impact of banning sunbeds in the UK. The model is now being re-used to incorporate updated costs and any negative utility impacts of a sunbed ban. Model outlined in supplemental material published alongside Eden et al. 2022 in British Journal of Dermatology

2. Created Taxonomy of Non-Health Value during my Doctoral Research Fellowship which provides a basis for incorporating non-health value into economic evaluations of genomic technologies. The taxonomy is published in Value in Health supplement for International Society for Pharmacoeconomics and Outcomes Research (ISPOR) 22nd Annual International Meeting. Boston 2017
